COURSE EQUIPMENT	14-65
COURSE SIGNAGE	71-150

...the very best in
branded golf course
products.

PINSEEKER

Presentation on the golf course is everything and the importance of making sure your golf club is making the most of what it has to offer cannot be underestimated.

If your golf club is planning to improve equipment presentation or signage; at Pinseeker we can make sure that your branding is sharp, consistent and appealing.

With our fresh approach and attention to detail, Pinseeker specialise in the design and delivery of the very best in branded golf course products.

Let us help you stand out from the rest with our extensive range of bespoke handcrafted golf tee and clubhouse signage, you can be assured that Pinseeker can help significantly increase the profile and branding of your club.

Complimented by a range of golf course equipment, including golf flags, flagpins and other course accessories; Pinseeker really can dress your course from tee to green and clubhouse to car park.

Whether you are an architect, developer or traditional golf club we are confident that at Pinseeker we have a package to suit.

Please feel free to contact us for a free consultation to see how Pinseeker can help, you may be pleasantly surprised.

COURSE EQUIPMENT

COURSE SIGNAGE

DESIGN, MANUFACTURING & MATERIALS

At our dedicated 5000 ft² manufacturing facility based in Cheshire, we combine traditional sign making and joinery techniques with the very latest machinery and state of the art design software to create a wide range of golf course furniture.

Where possible, all of our timber and timber products are sourced from third party independently certified well managed forests, in accordance with the UK Governments Central Point of Expertise in Timber (CPET) Category A.

Design

With the help of our expert team of designers Pinseeker will work with you to turn your ideas into reality.

Our skilled design team can create revisions of stylised artwork and 3D graphics to help reassure you that you are making the right choice long before we begin the manufacturing process.

This procedure can often be the most important, at Pinseeker we want to make sure that we give you exactly the products that you want and expect.

Along the way you will have control over the style or design of your product, we can even assemble a collection of potential products to help you visualise the overall branding or theme for your club.

Only when you are satisfied that the artwork reflects precisely how you would like it will we then turn the computer based design into the physical production of the real thing.

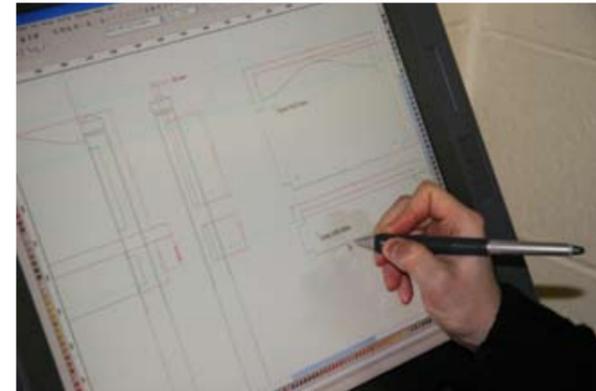

From here you can sit back and leave the rest to us...

3D Carving Technology

Pinseeker 3D carving technology can take your golf club logo to the next level. After years of careful research and development we have reinforced our reputation as the market leaders in 3D carving technology.

Once we have assessed your logo suitability for conversion to 3D, this technology can be used on many different types of signs and materials.

Utilising modern machinery and our expertise in manufacturing we can recreate your 2-Dimensional logo into visually outstanding 3D carved pieces of work; reproducing the highest quality skills of traditional carpentry with modern techniques.

Pinseeker pride's itself on manufacturing all it's signage commissions entirely in house combining the latest technology with traditional joinery techniques...

...have our expert designers digitize your club logo for a multitude of uses

Iroko Hardwood

At Pinseeker we use only tried and tested hardwoods from sustainable sources, the predominant species used is West African Iroko hardwood.

All frames made from hardwood will retain a certain amount of moisture content, therefore in posts over 100mm in thickness, some crazing or minor surface checking may occur soon after installation. This movement is totally natural and beyond our control, any movement that may occur is usually confined to the first year and in no way effects the suitability of the product.

Finishing

TEKNOS micro porous Aquatop coatings resist flaking and peeling whilst allowing the underlying timber to flex and breathe with nature's seasons.

In the Pinseeker finishing department the frames are sprayed with an Aquatop 2900 base coat stain. Once dry the base end grains are sealed to ensure maximum possible protection against moisture ingress. Finally, two topcoats of Aquatop 2600 are applied to give the final protection and colour required.

PLAQUE MATERIALS

Cast Granite

The ability to carve detail with state of the art CNC machinery makes cast granite one of our most popular plaque materials. An extremely stable material with a solid and uniform colour throughout, cast granite has the benefit that minor scuffs or scratches can be removed with an abrasive pad for plaque restoration.

No other plaque material available can be restored as effectively.

Standard Colours

Etched Zinc

Etched zinc plates have been popular for many years now and offer a traditional feel of quality.

Once a design has been approved it is then etched into the zinc, painted using flat or textured finishes then finally finished with clear lacquer for full UV protection.

The zinc substrate allows huge design flexibility especially when highly detailed logos are required.

Standard Colours

Natural Granite

An extremely durable material that once decorated gives a truly stunning look and a traditional feel of quality.

All designs are blasted into the plaques using aluminium oxide under high pressure, creating a permanently marked stone. All lettering is then in-filled using quality paints prior to a final lacquer coating.

Cast Bronze

With outstanding character and sharp definition our superb cast bronze plaques bring with them an air of real class.

When mounted into one of our hardwood tee posts the plaques look truly stunning. They also provide an ideal solution for mow-over signs.

Pinseeker have developed a method of manufacturing bronzes with evenly cast lettering and logos that are regarded by many as the best cast bronzes available.

RECYCLED PLASTIC

With an ever increasing demand for quality combined with economic value our range of recycled plastic products have been specifically designed to meet this criteria.

From a simple hazard marker post to a full range of golf course signage our multi-layered recycled plastic material is CNC machined and hand finished entirely in house in order to meet our strict level of production standards.

Rust proof, rot proof and jet washable!

Recycled plastic is not only eco-friendly but also economically priced representing excellent value for money.

AFFORDABLE

VERSATILE

IMPACT RESISTANT

HIGHLY VISABLE

Material in focus

Recycled Plastic

Increasing in popularity, recycled plastic is arguably our most resilient raw material. Supported by environmentally friendly credentials the sheets are manufactured from recycled plastic raw material into the surface of which we are able to directly carve.

The plastics are extremely stable with a solid hi-visibility colour and over the last few seasons have become an important part of the range.

Any message can be carved into the illustrated colour variations.

Eco-friendly products that won't cost the Earth

...Europe's leading manufacturer of fine quality golf course signage and equipment.

EUROPEAN & INTERNATIONAL

As Europe's leading dedicated manufacturer of quality bespoke golf course signage and accessories Pinseeker are at the forefront of design and supply to golf courses around the world.

CUSTOM FLAGS

Pinseeker are very proud of our impressive in house textile department, with several sewing stations and a total of twenty embroidery head units allowing us huge flexibility and more importantly, real time control of product quality ensuring that we deliver both standard and personalised flags of the very highest quality.

CUSTOM FLAGS

Embroidered Flags

For the ultimate in luxury flags pinseeker utilise the very latest design and precision embroidery technology to stitch your golf flag.

Embroidered flags are available single or double sided and feature reinforced stitching and a quad-stitched leading edge for added strength and durability.

Available in swivel tube, tie-on & velcro attachment types. Almost any thread colour is available to accurately reproduce your single or multicolour crest/logo.

**NOW AVAILABLE WITH ALTERNATIVE BORDER OPTIONS.
SEE NEXT PAGE FOR DETAILS.**

Printed Flags

Making use of recent software and printing advances, Pinseeker can now custom logo your golf flag with exceptionally clear graphics.

Printed flags are available single or double sided and feature reinforced stitching and twin-stitched leading edge.

Putting Green Flags

Compliment your practice green with the same quality custom flags as your main course.

Pinseeker practice green flags are manufactured to the same high standard as our main course flags with their swivel tube attachment, fit most standard flagpin types.

...Europe's leading manufacturer of fine quality golf course signage.

COURSE SIGNAGE

At Pinseeker we believe in quality, from the very beginning we have aspired to provide the very best in golf course signage and have worked tirelessly to achieve and maintain our reputation as Europe's leading manufacturer of fine quality golf course signage.

We treat all golf courses individually and understand that each signage commission is unique.

Our attention to detail, dedication and professionalism are just some of the reasons why many of the UK and Europe's leading golf courses look to Pinseeker for the supply of their golf course furniture.

Helping you make the next 100 years as special as the last...

Signature SERVICE

At Pinseeker we know how hard you've worked establishing a brand identity that resonates with your customers - our signature service helps serve as an extension of that effort. Adding a visual identity to course furnishings and accessories making a strong statement about the character and quality of your establishment; it's an impression your customers will remember long after their visit.

The signature service will make sure you stand out from the crowd, each piece a little different from our standard product with more flexibility for customisation and detailing that means each product will look equally eye catching as part of set or as a single standalone piece.

Unique and individual is what we aspire to recreate at Pinseeker; from a custom built entrance sign or 1st tee information sign through to a wall mounting for a bespoke time piece.

As the largest truly dedicated manufacturer of bespoke golf signs and furniture in Europe we have the skills and ability to mark your special occasion with something very special. With each piece hand crafted by our skilled team at our factory in Cheshire you can be assured that your occasion will receive the attention it deserves.

Pinseeker
THE SIGN OF QUALITY

SIGNATURE SERVICE

At Pinseeker we have developed an unrivalled reputation for custom and bespoke furniture.

If you are looking for something a little different from our usual range but equally impressive then we can custom build furniture and signs to match.

Bespoke manufacturing from the same skilled craftsmen and using the same quality materials, we can tailor our products to perfectly meet your needs.

Whether you are looking for a hardwood Iroko life-ring housing for your water feature or a bespoke divot box for the tee, then we can help.

From concept all the way through to design and manufacture we have the skills and expertise to deliver your vision.

"we can tailor our products to perfectly meet your needs"

ENTRANCE SIGNS

All our signs are bespoke and tailored specifically to your golf course. We can manufacture the entrance sign to any style using most materials and are confident the finish to our sign will guarantee your course a second look.

An entrance sign sets the tone and there are many design and material options available.

An imposing hardwood frame with well designed graphics will help create the right impression.

With so many options available Pinseeker's experience in the design and choice of material will ensure a finished product of the highest standard.

Available in a multitude of shapes, sizes and materials give Pinseeker a call today to discuss your bespoke entrance sign requirements.

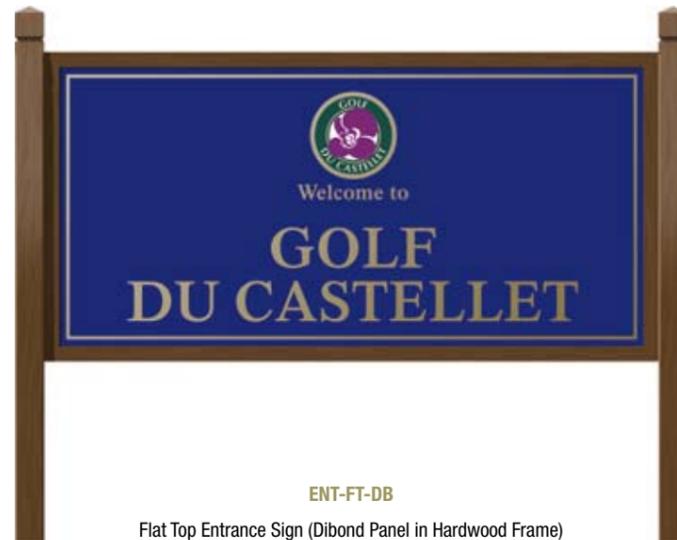

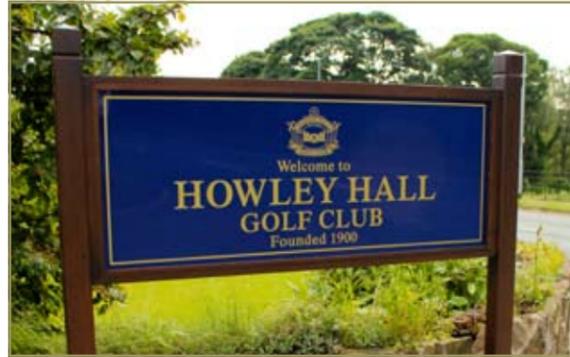

ENTRANCE SIGNS

Flat Top Entrance Sign

Overall Dimensions: 1720mm(h) x 2440mm(w)

Entrance Sign Options

All these entrance signs are available without legs for wall/fence mounting or with the following options to suit your installation requirements.

ENT-OPT-FM Single Fitted Message Panel

Sturdy Iroko bar with fitted message panel designed to be fit between the full width of the information sign. Machined channels in the post sections allow the message panel to slot safely into place. Reverse is blank for when instructions not required.

ENT-OPT-HM Single Hanging Message Panel

Designed to hang under your entrance sign and provide simple course information as required. Reverse is blank for when instruction not required.

ENT-OPT-EL Extended 3m Legs

Ideal option for areas where your sign is required to sit a little bit higher above a hedge or wall.

ENT-OPT-SMALL Reduced Size Entrance Sign

Identical in design and style to the range of entrance signs, but slightly smaller in size. Please contact us for further information.

Material in Focus

Iroko Hardwood Frames
At Pinseeker we use only tried and tested hardwoods from sustainable sources, the predominant species used is West African Iroko hardwood.

Not sure which way to turn?
Then let Pinseeker help point you
in the right direction...

FINGER POST SYSTEMS

Our hardwood finger posts stand tall and provide clear direction around the course.

Finished with cast granite or etched zinc plaques or carved directly into the timber, they can certainly add that extra little touch of class.

Your club logo can also be included on the plaque or inserted into the top detail section to assist in continuing the 'branding' theme across your golf course.

COURSE INFORMATION

As with the course signage, the course information sign needs tailoring to the individual club.

At Pinseeker we create systems that can include weatherproof clocks, magnetic data display areas and weatherproof poster holders.

The sliding and hanging message display panels can all be tailored to the individual requirements of your club.

We pride ourselves on our bespoke design services and as such we are always willing to work with our clients to create a system that fulfils your needs.

...tailored to the individual requirements of your club.

Bespoke Wall Mounted Information Sign

Bespoke Wall Mounted Information Sign

WALL MOUNTED COURSE INFORMATION SIGNS

If you need to improve how you relay information about your club events and course conditions then we have a course information sign to match. At Pinseeker we can personally customise our course information signs to perfectly fit your requirements.

Wall mounted options can be specifically designed to fill your available wall space with relevant important information making sure that your visitors and members are kept up to date on route to the first tee and around the course.

Bespoke carving direct into iroko hardwood is always popular and provides both traditional and a classic look to your course information sign.

Carved hardwood is only the beginning; other materials include carved and polished cast granite, natural granite, printed aluminium panels and the ever popular etched zinc and this is even before we have discussed the potential of using our leading 3D design capabilities.

The large array of design options include interchangeable information panels, dedicated sponsor details and even wall signs that can be manufactured to fit your own special starting clock.

At Pinseeker we have the skill and expertise to design, manufacture and deliver a first class product and service to meet your precise requirements.

Wall Mounted Course Information Signs

Overall Dimensions: 1125mm(h) x 1220mm(w)

If space is a premium, we have a range of wall mounted signs to suit.

Our Peak topped information signs are manufactured with a hardwood frame and dibond centre panel. These can be customised with interchangeable sliding messages, detailed graphics or just club information; making sure your members and visitors up to date at all times.

CI-WM-2

Dry Wipe Message Panels

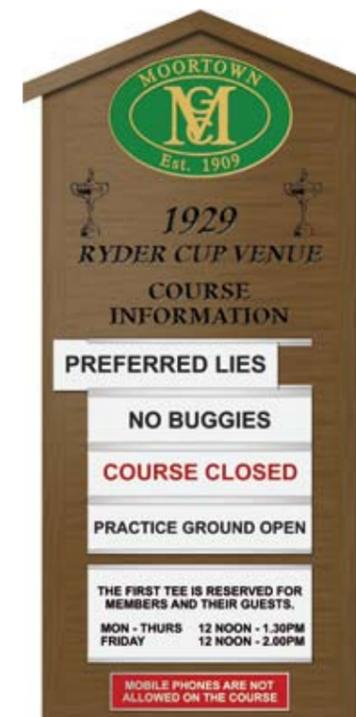

The 'Moortown' Course Information Sign

Quality comes in all shapes and sizes and the smallest course information sign in our range is proof of this.

Manufactured in hardwood Iroko for the natural look and feel, the course information sign is supplied with both carved information onto the sign and also an inlaid etched zinc logo plate.

With a choice of sliding message panels to relay the important information for your course, this sign may be smaller in size but no less striking on impact and quality.

Overall Dimensions: 1100mm(h) x 555mm(w)

Material in focus

Etched Zinc

The etched zinc plates have been popular for many years now and offer a traditional feel of quality.

Once a design has been approved it is then Etched into the zinc, painted using flat or textured finishes then finally finished with clear lacquer for full UV protection.

The Zinc substrate allows huge design flexibility especially when highly detailed logos are required.

SINGLE POST TEE SIGNS

Although a relatively simple design, the single post tee sign has become a true classic that provides a cost effective solution for many golf courses.

With its peaked top and fluted edges the style is ever popular.

Plaque inserts can be produced in natural granite, cast granite, etched zinc, cast bronze or carved directly into the Iroko hardwood timber itself making them a viable choice for any budget.

METAL FRAMES

The single post tee sign is also available in a metal option to complement the twin post sign. Fitted with an information plate the single post is powder coated to suit in the popular "Antique Copper", Black or White.

950 SINGLE POST TEE SIGN

The "950" is the largest single post tee sign in our range and this "giant" is unmistakable looking impressive on the tee.

With the information plaque comfortably large enough to accommodate all the tee information for three yardages and a good sized logo this tee sign can prove to be a very cost effective option.

For increased flexibility the addition of a hole map or sponsor plate can be inlaid below the header plaque to professionally complete the display of information on your tee area.

Material in Focus

Recycled Plastic

Increasing in popularity, recycled plastic is arguably our most resilient raw material. Supported by environmentally friendly credentials the sheets are manufactured from recycled plastic raw material into the surface of which we are able to directly carve.

The plastics are extremely stable with a solid hi-visibility colour and over the last few seasons have become an important part of the range.

With outstanding **character** and sharp definition our superb cast bronze plaques bring with them an air of real class...

MOW-OVER SIGNS

When an uncluttered, almost zero maintenance system is required for the teeing area, our mow-over tee signs are the perfect solution.

Providing a subtle and stylish marker the mow-over is available with our superb natural granite or cast bronze plaques and can also be used for creating an official fairway to green distance marker.

Available with/without a sandstone mounting plinth in round, square or oval styles.

NATURAL QUARRIED STONE

If natural stone boulders are what you are looking for then we can help.

At Pinseeker we work with some of the best quarries in the country and can help you find the right product to naturally suit your location.

Straight from the quarry, our natural stone boulders can be sourced for small 50kg boulder signs all the way up to extremely large 3 tonne rock signs.

Depending on your preference, the stone boulders can be left with rugged riven features or be cut to your specification.

With regard to the display of your information, the stone can then be hand carved, with your message indelibly cut into the rock surface or with a fitted plaque sized and mounted from bronze, zinc or cast granite as required.

Whatever your preference, you can be assured that we will take the time to hand select each boulder to match your design, ensuring the project meets with your expectations.

Don't just take our word for it...

At 7,587 yards off the back tees Rockliffe Hall required a grand and imposing Tee Sign to equal its stature, therefore natural hewn rock was the solution. Varying in height from 900mm to over 1800mm with some stones weighing in excess of 3 tons.

"Pinseeker's professional approach and attention to detail is the reason we awarded them the commission for the signature boulders at Rockliffe Hall. The results are truly stunning."

Davy Cuthbertson (Golf & Estates Manager, Rockliffe Hall)

STONE SIGNS

For a natural finish on the tee why not try our range of charismatic stone boulders.

Manufactured using our blends of reconstituted stone; these rocks look natural with the added benefits of being both robust and economic.

Our range of boulders play host to a variety of information/tee plaque sizes that can be produced in bronze, etched zinc cast and natural granite.

Depending on your chosen design style, the boulders can accommodate sponsorship information.

The boulders are supplied in buff sandstone as standard, but can be coloured red or custom coloured to suit, please ask us for more details.

Cast Bronze

With outstanding character and sharp definition our superb cast bronze plaques bring with them an air of real class.

When mounted into one of our stone boulders the plaques look truly stunning.

Pinseeker have developed a method of manufacturing Bronzes with evenly cast lettering and logos that are regarded by many as the best cast bronzes available.

Just need one or two replacement plaques?.....We can help with that too!

So you have not seen anything that suits you or you just need one or two replacement plaques?

At Pinseeker we can even make signs to match you current ones so you don't have to worry about the cost of replacing your signage across your entire site.

Let us custom make something for you to fit your existing frames.

Please contact us for further information.

TERMS & CONDITIONS

1. **Prices.** Prices quoted in the price guide are correct at the time of going to press. Goods will be invoiced at prices ruling at the time of dispatch.
2. **Settlement.** Strictly within 30 days of invoice.
3. **Small Order Surcharge.** Orders under the value of £35.00 Net value excluding VAT will be subject to a surcharge of £5.00 together with carriage unless otherwise stated.
4. **Cancellations.** Goods returned within 28 days must be returned unopened and in re-saleable condition complete with original packaging. Goods returned after 28 days will only be accepted at Pinseeker's discretion and will be subject to a 15% handling charge.
5. **Value Added Tax.** All prices are exclusive of VAT.
6. **Goods.** On receipt these should be examined by consignee. When this cannot be done they must be clearly marked 'unexamined'. If a clear signature is obtained for "Goods received in a good condition" no claim can be considered.
7. **Damaged Goods.** Claims for damaged goods must be notified to the Company's head office by telephone or e-mail within three days of delivery. In all cases, written confirmation is to be received by post within seven days of delivery. Claims notified after this period will NOT be considered.
8. **Non Delivery.** Non delivery must be notified within five days of receipt of the invoice and confirmed in writing otherwise no liability will be considered.
9. **Special Orders.** Goods required to be special orders, including personalised and bespoke manufactured product or nonstandard products, will be subject to extended delivery times and will require a non-returnable deposit to be paid prior to the commencement of custom manufacture.
10. **Artwork.** Once artwork or designs from Pinseeker have been approved by the Buyer, either verbally but preferably via email or fax confirmation; liability for accuracy is transferred wholly to the Buyer.
11. **Limited Warranty.** Pinseeker warrants its products to be free from defects in materials and workmanship. Pinseeker's sole obligation under this warranty shall be to repair, replace or refund, to its buyer, the price of the defective product or component. All such repairs, refunds and replacements are subject to rules, terms and conditions that Pinseeker may amend and promulgate from time to time. Abuse of use will invalidate any associated warranties of liability. Due to the natural properties of hardwood all timber products are excluded from any material warranties.
12. **Disclaimer of Other Warranties.** The foregoing limited warranty is in lieu of all other warranties express or implied, including merchantability or fitness for a particular purpose. In no event shall Pinseeker be liable for indirect, consequential or special damages of any nature whatsoever.
13. **Title of goods.** Title in the goods remains with the Pinseeker until full payment has been received by the company.
 - a) Should the buyer default in any payment when due, Pinseeker will be entitled to repossess all the goods held by the buyer which are still the sellers property (without prejudice to any other right or remedy arising out of such default in payment) and for this purpose Pinseeker will be entitled to enter upon the land or buildings on or which the goods may be situated and to remove the same. All costs incurred by Pinseeker in repossessing the goods shall be borne by the buyer.
 - b) Any goods so repossessed shall be sold and the proceeds of the sale set off against the amounts due to the seller by the buyer. Any balance remaining of the proceeds of sale shall be paid to the buyer. If the said proceeds of sale are not sufficient the buyer shall remain liable to pay to the seller the amount remaining due together with any interest accruing therein.

DEFINITIONS

The Buyer: The organisation/person purchasing the goods.

Please note Pinseeker has a policy of continual improvement, therefore we have to advise that sizes, weights, measurements and colours shown in the catalogue are nominal only and changes to designs, specifications and equipment may occur at any time without notice and without incurring any obligations. The precise specification of any article will always be given, if requested, on application.
