

Europe's Leading Manufacturer of Fine Quality

Golf Course Signage

PINSEEKER

Presentation on the golf course is everything and the importance of making sure your golf club is making the most of what it has to offer cannot be underestimated.

If your golf club is planning to improve equipment presentation or signage; at Pinseeker we can make sure that your branding is sharp, consistent and appealing.

With our fresh approach and attention to detail, Pinseeker specialise in the design and delivery of the very best in branded golf course products.

Let us help you stand out from the rest with our extensive range of bespoke handcrafted golf course and clubhouse signage, you can be assured that Pinseeker can help significantly increase the profile and branding of your club.

Complimented by a range of golf course equipment, including flags, flagpins and other course accessories; Pinseeker really can dress your course from tee to green and car park to clubhouse.

Whether you are an architect, developer or traditional golf club we are confident that Pinseeker will have a package to suit.

Contact pinseeker for a free no obligation consultation and see how our business could help yours.

COURSE EQUIPMENT

COURSE SIGNAGE

Pinseeker are proud to manufacture all our signage commissions entirely in house combining the latest technology with traditional joinery techniques...

DESIGN, MANUFACTURING & MATERIALS

At our dedicated 5000 ft² manufacturing facility based in Cheshire, we combine traditional sign making and joinery techniques with the very latest machinery and state of the art design software to create a wide range of golf course furniture.

Where possible, all of our timber and timber products are sourced from third party independently certified well managed forests, in accordance with the UK Governments Central Point of Expertise in Timber (CPET) Category A.

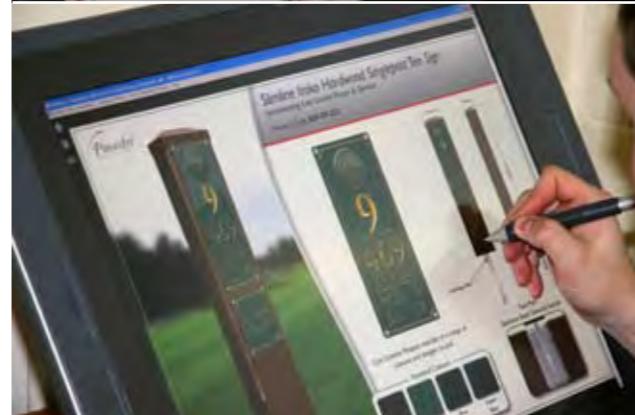

Design

With the help of our expert team of designers Pinseeker will work with you to turn your ideas into reality.

Our skilled design team can create revisions of stylised artwork and 3D graphics to help reassure you that you are making the right choice long before we begin the manufacturing process.

This procedure can often be the most important, at Pinseeker we want to make sure that we give you the products you want and the quality you expect.

3D Carving Technology

Pinseeker 3D carving technology can take your golf club logo to the next level. After years of careful research and development we have reinforced our reputation as the market leaders in 3D carving technology.

Once we have assessed your logo suitability for conversion to 3D, this technology can be used on many different types of signs and materials.

Utilising modern machinery and our expertise in manufacturing we can recreate your 2 -Dimensional logo into visually outstanding 3D carved pieces of work; reproducing the highest quality skills of traditional carpentry with modern techniques.

...have our expert
designers digitize
your club logo for a
multitude of uses

Iroko Hardwood

At Pinseeker we use only tried and tested hardwoods from sustainable sources, the predominant species used is West African Iroko hardwood.

All frames made from hardwood will retain a certain amount of moisture content, therefore some crazing or minor surface checking may occur soon after installation. This movement is totally natural and beyond our control, any movement that may occur is usually confined to the first year and in no way effects the suitability of the product.

Finishing

TEKNOS micro porous Aquatop coatings resist flaking and peeling whilst allowing the underlying timber to flex and breathe with nature's seasons.

In the Pinseeker finishing department the frames are sprayed with an Aquatop 2900 base coat stain. Once dry the base end grains are sealed to ensure maximum possible protection against moisture ingress. Finally, two topcoats of Aquatop 2600 are applied to give the final protection and colour required.

PLAQUE MATERIALS

Cast Granite

The ability to carve detail with state of the art CNC machinery makes cast granite one of our most popular sign substrates. An extremely stable material with a solid and uniform colour throughout, cast granite has the benefit that minor scuffs or scratches can be removed with an abrasive pad for plaque restoration.

No other plaque material available can be restored as effectively.

Standard Colours

Etched Zinc

Etched zinc plates have been popular for many years now and offer a traditional feel of quality.

Once a design has been approved it is then etched into the zinc, painted using flat or textured finishes.

The zinc substrate allows huge design flexibility especially when highly detailed logos are required.

Standard Colours (any RAL colour can be supplied on request)

Natural Granite

An extremely durable material that once decorated gives a truly stunning look and a traditional feel of quality.

All designs are blasted into the plaques using aluminium oxide under high pressure, creating a permanently marked stone. All lettering is then in-filled using quality paints prior to a final lacquer coating.

Cast Bronze

With outstanding character and sharp definition our superb cast bronze plaques bring with them an air of real class.

When mounted into one of our hardwood tee posts the plaques look truly stunning. They also provide an ideal solution for mow-over signs.

Dibond/Aluminium Panel

Simple but extremely effective and popular.

Dibond panels are universally used in sign making for their versatility and quality finish for many types of sign.

The panels are available in a variety of colours and can be finished with a laminated digital print or vinyl graphics.

Either way perfectly suited to match your requirements.

Trust in the brand....

Proud suppliers to many leading golf courses, golf groups and hotel chains.

Wherever golf is played in the world you can be sure that we have a product for you.

...Europe's leading manufacturer of fine quality golf course signage and equipment.

EUROPEAN & INTERNATIONAL

As Europe's leading dedicated manufacturer of quality bespoke golf course signage and accessories Pinseeker are at the forefront of design and supply to golf courses around the world.

At Pinseeker we specialise in the supply of signage and accessories for all stages of your golf course development, whether new from design and build to reconstruction projects or refurbishment and upgrading schemes.

Working with golf courses throughout Europe all the way to Canada, North America and Australia; at Pinseeker we are confident that we have the products to suit your requirement and budget.

...Europe's leading manufacturer of fine quality golf course signage.

Pinseeker
THE SIGN OF QUALITY

COURSE SIGNAGE

At Pinseeker we believe in quality, from the very beginning we have aspired to provide the very best in golf course signage and have worked tirelessly to achieve and maintain our reputation as Europe's leading manufacturer of fine quality golf course signage.

We treat all golf courses individually and understand that each signage commission is unique.

Our attention to detail, dedication and professionalism are just some of the reasons why many of the UK and Europe's leading golf courses look to Pinseeker for the supply of their golf course furniture.

Signature SERVICE

At Pinseeker we know how hard you've worked establishing a brand identity that resonates with your customers - our signature service helps serve as an extension of that effort. Adding a visual identity to course furnishings and accessories making a strong statement about the character and quality of your establishment; it's an impression your customers will remember long after their visit.

Unique and individual is what we aspire to create at Pinseeker; from a custom built entrance sign, a 1st tee information sign through to a unique bespoke time piece.

The signature service will make sure you stand out from the crowd, each piece a little different from our standard product with more flexibility for customisation and detailing that means each product will look equally eye catching as part of set or as a single stand alone piece.

As the largest truly dedicated manufacturer of bespoke course signage and furniture in Europe we have the skills and ability to mark your special occasion with something very unique. With each piece hand crafted by our skilled team you can be assured that your commission will receive the attention it deserves.

*Pinseeker*TM
THE SIGN OF QUALITY

"we can tailor our products to perfectly meet your needs"

SIGNATURE SERVICE

At Pinseeker we have developed an unrivalled reputation for custom and bespoke furniture.

If you are looking for something a little different from our usual range but equally impressive then we can custom build furniture and signs to match.

Bespoke manufacturing from the same skilled craftsmen and using the same quality materials, we can tailor our products to perfectly meet your needs.

Whether you are looking for a hardwood Iroko life-ring housing for your water feature or a bespoke divot box for the tee, then we can help.

From concept all the way through to design and manufacture we have the skills and expertise to deliver your vision.

COURSE INFORMATION

As with the course signage, the course information sign needs tailoring to the individual club.

At Pinseeker we create systems that can include weatherproof clocks, magnetic data display areas and weatherproof poster holders.

The sliding and hanging message display panels can all be tailored to the individual requirements of your club.

We pride ourselves on our bespoke design services and as such we are always willing to work with our clients to create a system that fulfils your needs.

...tailored to the individual requirements of your club.

Fabricated using dibond panels combined with stove enamelled aluminium posts to provide excellent durability.

Virtually any colour and message can be applied as a vinyl decal in order to highlight the required information.

Available in a variety of shapes and sizes and supplied flat packed for easy on site assembly.

Bespoke Wall Mounted Information Sign

WALL MOUNTED COURSE INFORMATION SIGNS

If you need to improve how you relay information about your club events and course conditions then we have a course information sign to match. At Pinseeker we can personally customise our course information signs to perfectly fit your requirements.

Wall mounted options can be specifically designed to fill your available wall space with relevant important information making sure that your visitors and members are kept up to date on route to the first tee and around the course.

Wall Mounted Course Information Signs

COURSE INFORMATION SIGNS

Overall Dimensions: 1125mm(h) x 1220mm(w)

If space is a premium, we have a range of wall mounted signs to suit.

Our Peak topped information signs are manufactured with a hardwood frame and dibond centre panel. These can be customised with interchangeable sliding messages, detailed graphics or just club information; making sure your members and visitors up to date at all times.

The 'Moortown' Course Information Sign

Quality comes in all shapes and sizes and the smallest course information sign in our range is proof of this.

Manufactured in hardwood Iroko for the natural look and feel, the course information sign is supplied with both carved information onto the sign and also an inlaid etched zinc logo plate.

With a choice of sliding message panels to relay the important information for your course, this sign may be smaller in size but no less striking on impact and quality.

SINGLE POST TEE SIGNS

Although a relatively simple design, the single post tee sign has become a true classic that provides a cost effective solution for many golf courses.

With its peaked top and fluted edges the style is ever popular.

Plaque inserts can be produced in natural granite, cast granite, etched zinc, cast bronze or carved directly into the Iroko hardwood timber itself making them a viable choice for any budget.

METAL FRAMES

The single post tee sign is also available in a metal option to complement the twin post sign. Fitted with an information plate the single post is powder coated to suit in the popular "Antique Copper", Black or White.

950 SINGLE POST TEE SIGN

The "950" is the largest single post tee sign in our range and this "giant" is unmistakable, looking impressive on the tee.

With the information plaque comfortably large enough to accommodate all the tee information for four yardages and a good sized logo this tee sign can prove to be a very cost effective option.

For increased flexibility the addition of a hole map or sponsor plate can be inlaid below the header plaque to professionally complete the display of information on your tee area.

Product in focus

Ground Sockets

All our single post tee signs are supplied complete with a two part stainless steel ground socket.

The female socket can be concreted into the ground whilst the male attachment is fixed to the base of the post thus allowing for easy removal for mowing and general maintenance when required.

CHUNKY SINGLE POST TEE SIGN

Similar to our large single post "950" and the standard slimline tee post, our "Chunky" 120 single post tee sign makes the ideal partner for the twin post tee signs.

All plaques are inlaid into the Iroko Hardwood post using our CNC machinery to ensure a perfect fit. Plaques are available in cast granite, etched zinc, cast bronze or carved directly into the timber.

The post is supplied with a two part stainless steel ground fixing that allows removal, for mowing or maintenance when required.

fairway distance
markers

Any distance can be carved into the illustrated colour variations.

Material in Focus

Recycled Plastic

Increasing in popularity, recycled plastic is arguably our most resilient raw material. Supported by environmentally friendly credentials the sheets are manufactured from recycled plastic raw material into the surface of which we are able to directly carve.

The plastics are extremely stable with a solid hi-visibility colour and over the last few seasons have become an important part of the range.

With outstanding **character** and sharp definition our superb cast bronze plaques bring with them an air of real class...

MOW-OVER SIGNS

When an uncluttered, almost zero maintenance system is required for the teeing area, our mow-over tee signs are the perfect solution.

Providing a subtle and stylish marker the mow-over is available with our superb natural granite or cast bronze plaques and can also be used to create an official fairway to green distance marker.

Available with/without a TecStone mounting plinth in round, square or oval styles.

MOW-OVER SIGNS

When an uncluttered, almost zero maintenance system is required for the teeing area, our mow-over tee signs are the perfect solution...

MOW-P-320-NG

Large Round Mow-Over Sign with Sandstone Plinth

Overall Dimensions: 325mm Ø Inc. TecStone Plinth

Providing a subtle and stylish marker the mow-over is available with our superb natural granite or cast bronze plaques and can also be used to create an official fairway to green distance marker.

Replaceable S.I. plates are available with Cast Bronze plaques.

Don't just take our word for it...

At 7,587 yards off the back tees Rockliffe Hall required a grand and imposing Tee Sign to equal its stature, therefore natural hewn rock was the solution. Varying in height from 900mm to over 1800mm with some stones weighing in excess of 3 tons.

"Pinseeker's professional approach and attention to detail is the reason we awarded them the commission for the signature boulders at Rockliffe Hall. The results are truly stunning."

Davy Cuthbertson (Golf & Estates Manager, Rockliffe Hall)

NATURAL QUARRIED STONE

If natural stone boulders are what you are looking for then we can help.

At Pinseeker we work with some of the best quarries in the country and can help you find the right product to naturally suit your location.

Straight from the quarry, our natural stone boulders can be sourced for small 50kg boulder signs all the way up to extremely large 3 tonne rock signs.

Depending on your preference, the stone boulders can be left with rugged riven features or be cut to your specification.

With regard to the display of your information, the stone can then be hand carved, with your message indelibly cut into the rock surface or with a fitted plaque sized and mounted from bronze, zinc or cast granite as required.

Whatever your preference, you can be assured that we will take the time to hand select each boulder to match your design, ensuring the project meets with your expectations.

For a more natural
finish to the tee...

STONE SIGNS

For a natural finish on the tee why not try our range of charismatic stone boulders.

Manufactured using our blends of reconstituted stone; these rocks look natural with the added benefits of being both robust and economic.

Our range of boulders play host to a variety of information/tee plaque sizes that can be produced in bronze, etched zinc cast and natural granite.

Depending on your chosen design style, the boulders can accommodate sponsorship information.

The boulders are supplied in sandstone colour as standard, but can be coloured red or custom coloured to suit, please ask us for more details.

COURSE SURVEYING

3D Laser Scanning

3D laser scanning enables tens of millions of individual laser points to be recorded and combined using our ClereGreenCreator™ software to produce millimetre accurate contour maps of your putting surfaces and surrounding areas.

Also widely known as 'rainfall charts' the contour maps will quickly identify the degree of fall at any point on your greens and highlight all 'puttable' pin locations.

Furthermore 3D Green laser scanning is a pinpoint accurate method for preserving, archiving, restoring and replicating your greens should they need rebuilding in the future.

Green Books

Produced for professional golfers on the European Tour and many golfing facilities are our Green Books which are a collection of drawings providing information about the putting green and its immediate surrounding area.

The information is used to help inform shot choices and to enable decision making to be more certain and quicker. Using the information is all part of effective planning around a golf course – just like knowing wind direction, driving lines and shot distances. The better the information players have available the more accurate their planning and shot making will be. Simple.

Find out more at www.progreenbook.com

Welcome to Clere Golf

We have forged an exciting partnership with Pinseeker Golf, combining their established collection of hand crafted signage with our range of specialist golf services and collateral.

Over 900 clubs and resorts around the world place their trust in Clere Golf. Be it a scorecard a course guide or the 3D laser scanning of your greens, we put the same energy and dedication into everything we do.

COURSE SURVEYING

GPS Surveying

Using high precision Trimble GPS technology we are able to capture important data about your course that will help you manage your most valuable asset and avoid any unnecessary overspend of materials and aggregates.

The data provided can be tailored to ensure we record exactly what you need but would include:

- GPS locations of all sprinklers and control valves
- Distances to the Front/Middle/Back of the green from each sprinkler
- Length and sqm of all teeing areas
- Sqm of all bunkers, lakes and fairways
- Length and sqm of all greens

Practice area can be analysed too including practice ground, short games areas and putting greens.

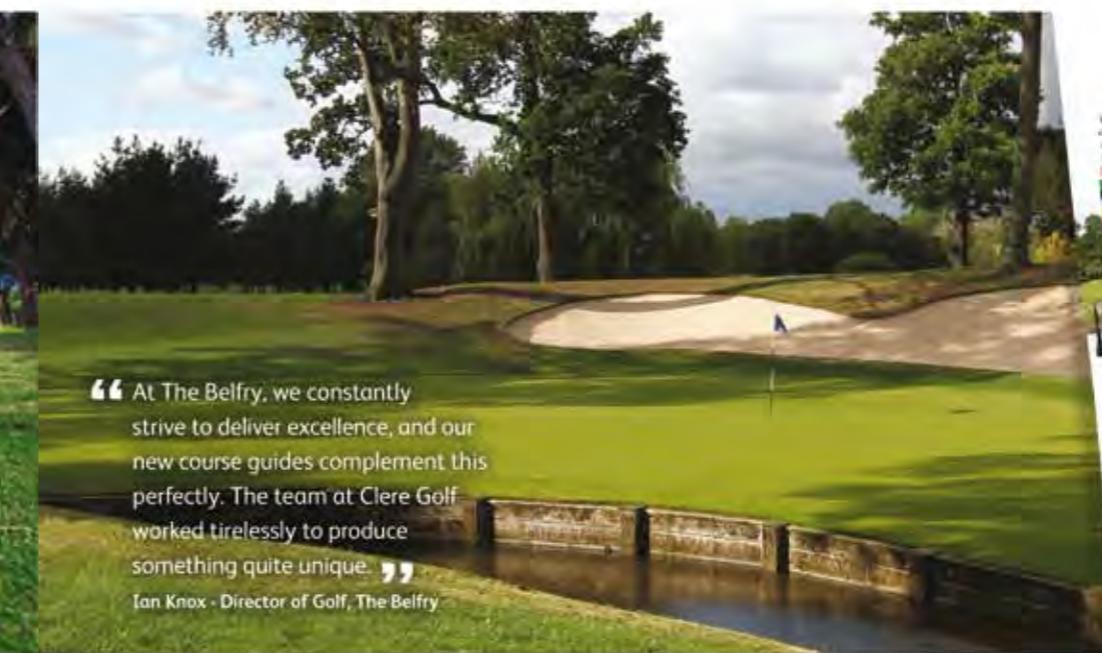

Course Measurement and Certification

Our experienced surveyors will measure your golf course from tee-to-green in accordance with CONGU regulations. Using state-of-the-art Trimble GPS and Nikon Laser technology we will:

- Measure all medal, forward, ladies and juniors courses
- Verify any on-course markers (100, 150, 200)
- Issue a signed certificate of length for both your local union and management teams

COURSE GUIDES

"At The Belfry, we constantly strive to deliver excellence, and our new course guides complement this perfectly. The team at Clere Golf worked tirelessly to produce something quite unique."

Ian Knox - Director of Golf, The Belfry

Course Guides

Our comprehensive range of course guides are used and trusted by hundreds of courses around the world. We also produce books for a number of professional golf tours and events including the R&A Final Qualifying Series.

With in-house production facilities we offer a wealth of flexibility too. For example if your course is due to undergo a program of alterations simply order small quantities during this period of change.

All course guides begin with a comprehensive tee-to-green survey when all measurements and information required for your book is captured.

Features include:

- Produced in a stapled or wire-coiled (flip-over) format
- No minimum order quantities
- No restrictions on content (space available for sponsors and advertisers)
- Bespoke books available for tournaments, key events or golf days
- No set style/design
- 2 day turnaround for 'emergency' stock
- Horizon view / tee photo's available as a tour-style option
- Graphics available for website use
- Wind maps provided for course maintenance planning
- Exclusive offer to all Pinseeker customers
- Receive an additional 5% of your order FOC

GOLF CLUB COLLATERAL

Scorecards and Pinsheets

In addition to practicality and functionality, a scorecard also adds value to your brand and provides a tangible element to a golfing experience. We produce tens of millions of scorecards for clubs and resorts worldwide, our experience ensures we develop the right style and design of scorecard to complement your club or resort's brand.

Each scorecard and/or pinsheet is individually designed with each 'grid' layout tailored to your club.

Features and options include:

- Single fold (4 page, 134mm x 166mm when flat)
- Double fold (6 page, 134mm x 244mm when flat)
- Triple fold (8 page, 134mm x 328mm when flat)
- 'Oversized' cards also available (each panel is 146mm x 108mm)
- A variety of grid layout including 'time par'
- Rounded / anti-snag corners for a premium finish
- Complete design service provided including adverts if required
- Next day delivery available for emergency scorecards

Other Products and Services Include:

Our range of products and services extend far and wide. If there is something you need which you don't see here please contact a member of our team who will be happy to assist. Samples of all products are available upon request.
